

Keep your eye on the ball

and relax safe in the knowledge that we've got your business covered.

In the digital age, the options available for you to secure your building, property and personnel have never been greater. Established in 1982, Pointer's Event Monitoring Centre (EMC) is so much more than a traditional Alarm Receiving Centre. Instead, our EMC is equipped to handle the latest in IP communications including:

- **Broadband satellite communication**
- **CCTV**
- **Wireless**
- **IntelligentVideo**
- **ANPR**
- **WebWay2424 dual path signalling**
- **GPRS**
- **DualCom**
- **Digital Communicator transmissions**
- **Fire**

Pointer's EMC is approved by National Security Inspectorate and has achieved Gold Certification for the monitoring of both fire and intruder alarm systems, and has achieved BS EN ISO8418 for the monitoring of CCTV Systems.

Pointer's highly trained staff currently monitor over 13,000 systems which come under the categories of multiples (large scale clients with multiple sites), individuals and foreign connections from third party customers.

Pointer's EMC is a state-of-the-art centre which can monitor all types of signalling data on a 24 hours a day, 365 days a year basis and the centre itself is highly secure with superior protection against fire and lightning, meaning you can concentrate on other aspects of the business, safe in the knowledge that your premises are protected by an organisation you can trust.

The complete 21st century solution to your security needs
